DETAILED ACTION

This action is responsive to the amendment/submission filed 9/06/05 and 7/31/2006, which has been entered. Claims 1-13 are currently pending.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 2. Claims 1-13 are rejected under 35 U.S.C. 102(b) as being anticipated by Bruchner et al. (5,820,503). Bruchner et al. discloses an idler having a pulley supported by a bearing (2) and the bearing mounted on a tension-adjusting member (3), wherein the tension-adjusting member is in communication with a dual function fastener.

In claim 2, note the tension adjusting member is a cylinder that cooperates with the inner portion of the bearing (2), and an eccentric bore axially therethrough.

In claim 3, note the tension adjuster comprises a reaction friction surface and a resistance surface (see attached drawing).

In claim 4, note the reaction resistance surface with a reaction-mating surface of the fastener and the resistance friction with the mounting surface.

Regarding claim 5, note the arm (1) having a pulley mounting portion and a dual fastener bore at (11) at one end.

In claim 6, note the curve slot (9) in the cylindrical portion of the tension-adjusting member.

In claims 7-12, Bruchner et al. Discloses the claimed invention above.

3. Regarding clam 13, it is apparent that the method steps are included during the application of Bruchner et al. device.

Response to Arguments

1. Applicant's arguments filed 9-06-2006 have been fully considered but they are not persuasive. Applicant contended that Bruchner et al. fails to disclose the dual fastener as described in the disclosure. Examiner thanks applicant in providing clear detailed explanation of claimed the invention. However, the claims do not support these specific details and are extremely broad. The claims broadly read "the tensioning adjusting member being in communication with a dual functioning fastener. This extremely broad limitation is open to extremely broad interpretation. Bruchner et al. clearly shows a tensioner in communication with a dual fastener. Note, in figure 1 of Bruchner et al. the fastener (12) is has dual functions. Note also, the fastener 6 has dual functions in that it fastens and adjusts the tension of the pulley on the belt. Therefore, the fasteners have dual functions. It appears that applicant is interpreting the claims in light of the specification.

However, it is noted that the features upon which applicant relies (see applicant's remark) are not recited in the rejected claim(s). Although the claims are interpreted in light of the specification, limitations from the specification are not read into the claims. See *In re Van Geuns*, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993).

Therefore, for reasons give above, the rejection is proper.

2. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Marcus Charles whose telephone number is (571) 272-7101. The examiner can normally be reached on Monday-Thursday 7:30 am to 6:00 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Ridley Richard can be reached on (571) 272-6917. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
